

Locum Needed in Kona!

One of our pediatricians has discovered that he has some immediate health concerns that will keep him out of work for approximately six to eight weeks. Therefore, we have a need to fill some vacancies in our schedule and are looking for some locums to assist us.

Our needs are definitely to fill the void we have in taking call. The call for a 100 bed hospital, like in Kona, is not overly taxing. However, like in all hospitals, a delivery or emergency room need can always become urgent with little notice.

An additional need is in the office. If we had a physician who was comfortable seeing office based patients for a few days periodically, that would also be great. But again, this is a secondary need to that of call coverage for the hospital.

Any help that we could obtain would be greatly appreciated. I can be reached at 808-854-7727.
